2022-2026-CSE-A

Aim:

Write a C program to illustrate Indexing of a file.

Take an array of integers and find whether the given integer is present or not using file indexing method and print the output as shown in the sample output.

Source Code:

fileIndexing.c

```
#include <stdio.h>
#define MAX 25
struct indexfile
   int indexId;
   int kIndex;
};
int main()
   int numbers[MAX];
   struct indexfile index[MAX];
   int i, num, low, high, br = 4;
   int noOfStudents;
   printf("How many numbers do you want to enter:");
   scanf(" %d", &noOfStudents);
   printf("Enter %d numbers:", noOfStudents);
   for (i = 0; i < noOfStudents; i++)</pre>
      scanf("%d", &numbers[i]);
   for (i = 0; i < (noOfStudents / 5); i++)
      index[i].indexId = numbers[br];
      index[i].kIndex = br;
      br = br + 5;
   printf("Enter a number to search:");
   scanf("%d", &num);
   for (i = 0; (i < noOfStudents / 5) && (index[i].indexId <= num); i++);
   if(i != 0)
   low = index[i - 1].kIndex;
   else
   low = 0;
   if(index[i].kIndex != 0 && index[i].kIndex <= noOfStudents)</pre>
   high = index[i].kIndex;
   else
   high = noOfStudents;
   for (i = low; i <= high; i++)
      if (num == numbers[i])
         printf("Number found at position:%d", i);
         return 0;
```

```
printf("\nNumber not found.");
   return 0;
}
```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
How many numbers do you want to enter: 5
Enter 5 numbers: 1 5 6 9 12
Enter a number to search: 6
Number found at position:2

Test Case - 2	
User Output	
How many numbers do you want to enter: 7	
Enter 7 numbers: 2 3 6 9 12 20 25	
Enter a number to search: 20	
Number found at position:5
